

DON'T BRING ZIKA HOME

USE EPA REGISTERED
INSECT REPELLENT.

USE PROTECTION OR AVOID
HAVING SEX DURING AND
AFTER VISITING AN AREA
WITH ZIKA.

WEAR PROTECTIVE
CLOTHING.

Zika is a virus that is spread through the bite of an infected mosquito, or unprotected sex with an infected partner.

Most people don't get symptoms. But symptoms can include fever, rash, joint pain and/or red eyes. While there is no treatment or vaccine for Zika, you can protect yourself, your family, and your community when visiting areas at risk for Zika.
