

Diana Romero joins us as a Retired Annuitant and will assist OHE's Business Operations Unit A.

Diana's career began in the private sector at Safeway Stores, Inc. and Procter & Gamble, Inc. before joining State Service. Her State Service career started at the Department of Health Services before moving to the Water Resources Control Board's (Water Board) Drinking Water Program, where she spent her final 25 years before retiring in 2014.

When Diana joined the Drinking Water Program, a new legislatively mandated program had been enacted that required the Water Board to provide monetary assistance to business owners who were required to cleanup contamination caused by underground storage tanks. Diana assisted in the development of many facets of this new program to assist teams in ensuring that all legislatively mandated requirements to the program were being met by applicants.

Diana enjoys working and helping people. The Water Board gave her an opportunity to develop relationships and work with internal and external customers such as Statewide local offices: Counties/Cities, Fire Departments, Police Departments and various agencies who regulated underground storage tanks.

Diana believes in being kind and treating people with respect.

Diana enjoys fitness and has been a CrossFitter for 9 years. She enjoys traveling, hiking, paddleboarding, reading and family time.
